SUSTAINABLE  
OUTCOMES

# 4# DNA FORENSIC SYMPOSIUM

VICTORIA FALLS | ZAMBIA | 21-23 MAY 2024

- WHERE JUSTICE, SCIENCE AND HUMANITY INTERSECT -

**DNAforAFRICA, ICRC, UNODC, and UCT** are proud to present the 4th Forensic DNA Symposium, a groundbreaking event supported by the **Zambian Government**, bringing together African and International Forensic Experts.

This year's format will exclusively offer in-person attendance. The event has been organised into two pivotal tracks, which will run concurrently. Participants will select the track where their expertise will contribute most effectively to the engagements.

## KEY SYMPOSIUM HIGHLIGHTS

### TRACK 1:

#### Objective: DNA Database Discussions

Bridging gaps for improved identification and investigation on a regional basis.

### TRACK 2:

#### Objective: DNA & GBVF Sessions

How can DNA evidence improve access to justice for victims of GBVF?

The two workshop days will be structured as follows:

On day one, there will be short presentations followed by panel discussions, requiring audience engagement on key developmental areas. On the second day, there will be working group sessions and audience participation. The aim is to collaboratively create a sustainable regional framework with clear steps for implementation.

Don't miss this exceptional opportunity to connect, learn, and contribute to advancements in developing forensic capacity and regional platforms in Africa.
